TECH SKILLS

- C & C++
- Python
- JS
- SQL & NoSQL
- React
- GitHub
- AI tools (Claude, Cursor)

SOFT SKILLS

- Project management, from concept to profitability
- High social skills
- Organised and responsible
- Specialization in communication networks and cybersecurity

LANGUAGES

- Hebrew - Native
- English - Fluent

CERTIFICATIONS & COURSES

- Small business owner course alumni, Maof Company.
- First aid responder, Hatzala Organization

Aviya Arusi

Software Engineer

ABOUT

Computer Science & Mathematics graduate with hands-on experience building **AI-related software**, backend systems, and security-focused tools. Experienced in Python, JS, and modern development workflows, with a strong interest in applied AI, LLM-based products, and secure production systems.

PERSONAL PROJECTS

AI Model Content Disarm and Reconstruction SDK

- Developed a **Python**-based SDK to secure AI models against serialization threats using object-oriented programming (**OOP**).
- Integrated **ModelScan** and **Fickling** to detect vulnerabilities in formats like **Pickle**, **Dill**, and **Joblib**.
- Implemented comprehensive disarmament for all models, neutralizing threats such as remote code execution and lambda injection.
- Enhanced AI model security by ensuring safe deserialization through advanced threat detection and mitigation techniques.

Mishtaken Hacham - Smart Housing Lottery Platform:

- A data-driven web platform that centralizes and simplifies Israel's "דירה בהנחה" housing lottery information. Built with **Next.js**, **TypeScript**, and **Tailwind CSS** for a fast, responsive, RTL user experience, the platform integrates **Supabase** for database management, authentication, and automated data ingestion. The system analyzes official lottery data, calculates eligibility-based chances, and provides smart filtering, statistics, and an investment feasibility calculator. Deployed with **Vercel** and managed through **Git**, the project focuses on making complex government housing data accessible, transparent, and actionable for users.
